Blumenthal's Boys' Suits have been famed throughout El Paso for more than eighteen years. They are precise counterparts of the garments created by the ultra-fashionable boys' tailors of Fifth Avenue, New York.

But our clothes are more than merely fashionable clothes. They are made with the utmost care and give the very best of wear. The largest stock to select from in the southwest.

Our spring line of Men's and Boys' Clothing, Furnishings, Hats, Trunks and Suit Cases is now open for your selection.

BACK FROM MINES IN NORTHERN MEXICO

Idaho Man Has Been Down
in the Guaynopa Min-
ing District.

Capt. A. S. Anderson, mining and civil engineer, of Menan, Idaho, is at the Ziegler, on his way home from a trip in the Guaynopa mining district, on the dividing line between the states of Chihuahua and Sonora, Mexico, where he has been making surveys of the mining properties of the Tres Amigos Gold Mining company, of which R. L. Croft, of Colonia Juarez, is president and general manager, and Charles E. Starkey is secretary and treasurer. The company owns the Tres Amigos and a dozen other properties.

"The Tres Amigos company is doing extensive work, now that the Pearson railroad is approaching that section," said Capt. Anderson, "and among other things, we have just uncovered a large body of lead-silver ore in the Cinco de Mayo claim, and also a large body of high grade copper sulphides in the form of chalcocite."

"In the Silver King, owned by Croft and associates, independently of the aforesaid company holdings, a large ore body has just been discovered, carrying lead, silver and copper. In fact, there have been half a dozen rich strikes made in the past few weeks in that camp that would be regarded as phenomenal in the western districts of the United States."

El Paso Owners of Property.
"Patch and Mule" and R. C. Hatton, of El Paso, own a property called the Carolina, with a vein over five feet wide, carrying a sylvanite ore. Samples recently taken out run \$6000 a ton in gold. This rich ore, of course, occurs in bunches, the same as was the case in Cripple Creek. But you know we mining men of the north believe that telluride ores in a vein signify permanency and continuity.

"James W. Taylor, of El Paso, and associates have the Mascot and Encina mines, near the mines I have mentioned, which are very attractive looking properties. T. V. Nafe owns the Arcos mine and about 400 acres of well located mineral ground in the same neighborhood."

"The Cinco de Mayo claim has one vein with a pay streak from six inches to two feet wide, the ore of which averages \$700 a ton in gold. It is a vein of quartz cutting through diorite porphyry. The other vein is eight feet wide, the ore of which runs from \$100 to \$1000 a ton. One of the newly discovered copper veins is four feet wide with a pay streak of copper, running 35 percent copper a ton and four ounces gold and 1200 ounces silver a ton."

The Seven Stars Mine.
"About a quarter of a mile north of the Tres Amigos is the Seven Stars mine, and adjoining this, the superintendent has found a very rich vein, carrying silver and lead, and also copper. The vein is 12 feet wide, and the discoverer says that it runs under the Seven Stars mine, although it is hidden on the surface. Another property of Croft's is the San Augustine, which shows up very rich ore right from the grass roots."

"It is said that Charles Seawall and Terrazas, of Chihuahua, have secured the concession for a railway to be constructed from Chihuahua to the Guaynopa district, and that the survey recently made shows that the maximum grade will be only 2 percent. They will put the smelter at the mines and not at Madera, as has been stated. The mines own some very valuable properties in the Guaynopa district, and will smelt not only their own ores, but also do custom work for other mine owners."

"An old prospector, who has been mining for many years, has been looking over the newly discovered gold fields of the Carolina district, which is in northern Nevada, near the line of Idaho and south of Twin Falls. I saw lots of the ore from that phenomenal camp just before I came south, and talked with several conservative mining engineers from there, and all agreed it will be another and greater Cripple Creek this summer. It is a sylvanite camp, which gives mining men faith in it. Twin Falls is only five years old, and has 7000 people."

MINING AFFAIRS IN CLIFTON CAMP

Copper Company Is Putting
Down Big Pipe Line;
Building Hospital.

Clifton, Ariz., March 9.—The Arizona Copper company is now laying an emergency erected wood 18-inch pipe line to its so-called salt reservoir, about one mile above town, the purpose of which is to supply the works with clear water at flood times, and also during dry seasons to furnish an ample supply. The tank or well is kept full by means of a hot spring water, which abounds all along the Pima river.

The Shannon Copper company is building a new hospital on its beautiful addition to Clifton, near the works; also a large warehouse and general office. The depot for the new Shannon Arizona railway will be built on or near the site of the present hospital, opposite the Shannon store. New and improved ore bins are being erected at the works. Roundhouse and sidetracks are also under construction, and altogether the Shannon hill is the liveliest part of town.

REPORTED PLATINUM TURNS OUT TO BE IRIDIUMINE.

Platinum is being constantly reported from the placer and dredging areas of the California gold belt. It now seems questionable whether this so-called "platinum" is not largely iridiumine. A recent shipment of metal from Oroville, supposed to be platinum, turned out to be wholly iridiumine.

The amount was 31 ounces, resulting as a by-product from the treatment of approximately one million cubic yards of gravel, and was paid for at the rate of \$18 per ounce. The metal is obtained by washing the skimmings from the amalgam in a rocker, after previously removing the bulk of the iron with magnets.

EXAMINING MINES.

C. H. Merkle, mining engineer of Fort Worth, is examining the Cinco de Mayo mines near Chihuahua, Mexico, for a Fort Worth company, which is negotiating for the purchase of them. He returned home yesterday.

THE GREAT DIVIDE

El Paso to Get
Her Full Share of

\$30,000,000.00

The passage by the Senate of the \$30,000,000.00 bond bill for irrigation purposes has been received in El Paso with the greatest satisfaction. There is no doubt that this bill will also be passed by the House at an early date.

El Paso will get her proportionate share. When this money is available for the Elephant Butte Dam project El Paso will prosper as never before. The Upper and Lower Valleys will become real assets and this, added to what El Paso already has, means much to owners of suburban property.

The outlook for the future was never more favorable. If you have previously made money in El Paso suburban real estate, now you have an opportunity to make more. If you have never been so fortunate, now is the best time to make a beginning.

We offer our services in this connection, with the assurance that we will give you the full benefit of our many successful years of experience in the El Paso real estate market. The "great divide" of \$30,000,000.00 is not to be passed over lightly. You should derive as much direct benefit as possible. The indirect benefit will come to everyone.

A Desert Fight

By M. D. Lattin, of Clifton, Ariz.

A prospector on the plains of Arizona meets with many incidents, both startling and comical. I recall one that happened to the writer several years ago on a journey from Yuma, Mohave county, Arizona.

After being on the road till nearly sundown, I took my shotgun from the pack and trailed each side of the road to get a cottontail rabbit for my evening meal. Not being successful, I resplashed the gun in the pack and trudged along, being tired of riding. I speak of this to explain what might have happened had the gun remained in my hands.

I was walking along meditating with the burro pack train being out ahead, when all of a sudden the burros struck up their ears, gave a snort and let out down the road on a run.

Looking around to find the cause of their fright, I observed a Mexican crawling from beneath a Yucca palm tree near the road side. I commenced to fiercely berate him for scaring my animals, whereupon he started toward me with a sharp stick in his hand, or rather with a greasewood stick with a

Spanish dagger, a desert cactus fastened to it. I called to him good and loud and shook my fist at him, but he still kept coming, and, considering that it might be safer to move on, I started to get out of his way. He then made a lunge for me and I lit out for the tree with McGreaver a close second. We sifted the sand around that desert, Yucca, several times, and he succeeded in getting a jab in on my back.

Then I turned and succeeded in knocking him down. After punching and kicking his carcass for several minutes, a Wallapai Indian crawled up out of a little arroyo near by and remarked: "You catch him." Heep crazy. I felt like jumping on that Indian and remarked: "Why didn't you help me, you infernal rascal?" He shook his head, and we proceeded to tie the captured crazy man, who had been surprised empty away out on the desert and the bluff I tried to make that wouldn't stick.

About this time the officers rode up and, hearing my story, their mirth was loud and boisterous. I have often thought of my surprise party away out on the desert and the bluff I tried to make that wouldn't stick.

RICH VALUES IN TAILINGS

Henry D. Boddington Is
Working Property in
Chihuahua, Mexico.

Dr. Henry D. Boddington, who makes El Paso his headquarters, and is operating mines in the western part of the state of Chihuahua, Mexico, after a few days' visit in this city left for Denver last night, where he will remain a few weeks, having some metallurgical tests made on ores of his mine, and in purchasing machinery for handling the ores. The doctor has purchased several properties in the famous Uruachi district, among the being the San Jose and San Pedro mines, near the river, and La Maria mine, near Uruachi. These mines are north of Creel, but the nearest station of the Kansas City, Mexico & Orient railroad at present is Cuesta Prieta. Four properties in which he is interested have a record of producing several million dollars to the former owners, who were Mexicans. The ores at depth became complex and they were unable to save the gold and silver values. In the tailings a great many thousand ounces of gold were lost.

REORGANIZE BISBEE COMPANY.

Bisbee, Ariz., March 9.—The Bisbee Copper Mining company has been reorganized, and will resume work soon. The company's property is the Gunsite mine, which was famous in the days of the silver boom and yielded over \$20,000 worth of that metal. A vein about five feet wide has been encountered, and other veins are expected to be found. In addition to the old Gunsite, the company owns five claims nearby. Development work, which is being done at present by contract, will be carried on as fast as possible, and, according to an official statement, a Lyner air compressor will be installed soon.

SHIPS ORE TO SMELTER HERE

Pioneer Mining Man of New
Mexico Has Good Claims
Near El Paso.

Volney Rector, a pioneer mining man of southern New Mexico, who owns mining properties of great promise south of Victoria, a station on the Southwestern, about 30 miles west of El Paso, arrived yesterday with a car of ore, which is being treated at the smelter.

His mines consist of two distinct groups, one of which is called the Eagle group, which is close to the international line, two and a half miles south of Monument No. 40, and are in the Sierra Rica. There are four claims in this group. On one an incline shaft has been sunk 60 feet, cutting through iron ore carrying silver and gold and lead.

The present trial shipment is from this Eagle shaft. From this opening, 100 feet south, another shaft has been sunk on the hill to a depth of 45 feet, and from the bottom of this a crosscut has been run to the first named shaft. The last named shaft shows fine silver-lead ore, and from it two carloads have been shipped to the El Paso smelter, some of it running as high as 30 ounces silver and 60 percent lead. The ore shipped netted \$10 a ton.

"When properly dressed," says Mr.

Rector, "the ore will net \$20 a ton."

The other properties, called the International group, are two and a half miles east of monument No. 40, and butt up against the east and west international line, and are only six miles south of Victoria station. This group consists of two claims. The vein of the International is a fissure, with a north-south strike and dipping to the west a little. The property is equipped with comfortable dwelling house, store house, blacksmith shop, and assay office. A horse whim is on the shaft. Recently, Mr. Rector sank a well two miles west of the Eagle and struck a good flow of water, which is of great value to the district.

EL PASO INSPECTS MINE IN NAICA DISTRICT OF MEXICO.

Edward Shaw, of this city, is engaged in sampling and testing the ores of the greatest mine at Naica, belonging to the Naica Consolidated Mines company. The Naica mine is situated in the southwestern part of Mexico, and will be gone for 30 days. It is understood that the narrow gauge railroad to Naica from Choncha station on the National railroad below Santa Rosalia is under operation and that Mr. McDaniel is handling the proposition.

INSPECT ARIZONA MINE.

Walter Harvey Weed, geologist and mining expert, and his partner, Frank H. Probet, are inspecting a mine a short distance from the Ray mine in Arizona. Mr. Weed was formerly consulting engineer of the Levisons, who own the Ray Central at Ray and the Planet mine in the Bill Williams country. Weed and Probet are now located in Los Angeles. Mr. Weed made a special report on the tin mines of Mount Franklin, in the United States geological survey, which was published in bulletin form.

DYSPEPSIA, GAS, HEARTBURN AND ALL STOMACH DISTRESS VANISHES.

A little Diapiesin makes
your out-of-order Stomach
feel fine in five
minutes.

The question as to how long you are going to continue a sufferer from indigestion, Dyspepsia or out-of-order stomach is merely a matter of how soon you begin taking some Diapiesin.

If your stomach is lacking in digestive power, why not help the stomach to do its work, not with drastic drugs, but a re-enforcement of digestive agents, such as are naturally at work in the stomach.

People with weak stomachs should take a little Diapiesin occasionally, and there will be no more indigestion.

no feeling like a lump of lead in the stomach, no heartburn, Sour risings, Gas on Stomach or Belching of undigested food, Headaches, Dizziness or Sick Stomach, and besides, what you eat will not ferment and poison your breath with nauseous odors. All these symptoms resulting from a sour out-of-order stomach and dyspepsia are generally relieved five minutes after taking a little Diapiesin.

Go to your druggist and get a 50-cent case of Pappe's Diapiesin now, and you will always go to the table with a hearty appetite, and what you eat will taste good, because your stomach and intestines will be clean and fresh, and you will know there are not going to be any more late nights and miserable days for you. They freshen you and make you feel like life is worth living.

El Paso Trunk Factory Trunks, Bags and Suit Cases made, repaired and exchanged. Opposite postoffice, across Plaza. Tel. 1054; Auto 1965.

BURGLAR BREAKS INTO TUCUMCARI RESIDENCE

John Welch, Roadmaster, Is Promoted
to Position in El Paso—Work
Progresses on Sewer.

Tucumcari, N. M., March 9.—Burglars broke into the residence of Mrs. T. J. Erskine, while she was absent and ransacked the house. A few dollars were taken out of a trunk.

John Welch, roadmaster for the E. P. & S. W., has been transferred to El Paso. Mr. Welch is one of the oldest roadmasters in the employ of the company and is popular with the railroad boys.

H. R. Buchanan has purchased a half interest in the Jones meat market.

The tunnel of the sewer under the tracks of the E. P. & S. W. railroad has

been completed. The contractors think they will be able to complete the entire system within 30 days.

Felipe Ortega, a Mexican, has filed a suit against the Ware Construction company for \$10,000 damages. The city council has employed A. D. Pankey to fill the position as fire inspector.

MARFA NEWS NOTES.

Marfa, Tex., March 9.—News has been received here from A. R. Main, of Delaware, O., of the death of his half-brother, Frank Hubbel, in Mexico. Mr. Hubbel was well known here.

Miss Laura Wilcox, primary teacher in the public schools here, is visiting her sister in Atlantic City, Tex. Mrs. Horner Colquhoun is teaching for her in her absence.

Mrs. Arthur Mitchell left this morning for Uvalde, where she goes to be with her sister, who is very ill.

Joe Powers of Del Rio, an employee of the G. H. & S. A., was in the city lately.

Mrs. Frank Mitchell will give a reception to the pupils of her Sunday school class at her home Friday night, from 7 to 10 o'clock.

DEVELOPMENT CONTINUES NEAR CLIFTON, N. M.

Cutter, N. M., March 9.—Mr. Weston and Mr. Westlake, both of the Victoria Chief Mining company, have gone over to the Hillsboro district.

Miss Howe-Bigelow is there and will give her attention to the "Statehood" group of mines. The company expects to begin shipping ore soon. These mines have been known by several names, the last being "Sierra Consolidated."

Development work is going on in the different districts of the Chisos. A late find is reported on the west side of the mountains, in the neighborhood of Shadow, the placer country, that created so much excitement some years ago.

TO WORK FOR SOUTH TIGRE.

Bisbee, Ariz., March 8.—John J. Hill has left here to accept a position as mine superintendent of the South Tigre property, which adjoins the famous El Tigre or Lucky Tiger mine in Sonora, Mexico, for which an English syndicate recently offered \$7,500,000.

The South Tigre is owned principally by people from El Paso.

HIGH GRADE ORES.

The Segurana Mining and Milling company in the Zecapapan district, Mexico, has sent 25 tons of high grade concentrates to the Monterey smelter and has more leaving the mill. The ore runs 10 kilos in silver and also has high gold values. The mill is a custom plant and handles much of the ores of the district.

Traveling Salesmen are Wanted

to place exclusive contracts with local agents to sell T. J. SATURDAY EVENING POST in towns with less than 1,000 inhabitants.

This is an exceptional side-line proposition to county roadmen covering country towns. Something new and "different"—a really profitable side line.

There is no expense to you, no outfit to buy and no canvassing to be done. Nothing to carry—at least, not more than a pocketful.

A good chance for money-earning on a commission basis. Name the county you prefer.
